Animal Proteins

Market Activity

The protein market was quiet today with. No changes reported. Blood meal prices have held steady this week while other proteins have fallen around the market. It's reasonable to expect the downward tone in the MBM market to spill into the bloodmeal market, given the pressure is supply driven. October has been the worst performing month for the ruminant bloodmeal market in terms of a move higher relative to the month prior. Over the last ten years the Mo. River ruminant blood meal market has moved higher relative to September just twice.
